[Broken Waves](#) Dec 23 2019 " [A] magisterial history of twentieth-century Fiji.... The historical research is thorough and scrupulous, and the presentation is lucid. Lal brings together a wealth of information, much of it previously unavailable and the earlier available materials often reframed in thought-provoking ways.... Perhaps its greatest strength is that it presents the history of modern Fiji as very complicated and multifaceted. Education in Australia, New Zealand and the Pacific Jun 09 2021 This book provides an up-to-date and well-grounded analysis of education in Australia, New Zealand and the Pacific, including Cook Islands, Federated States of Micronesia, Fiji, Kiribati, Marshall Islands, Papua New Guinea, Samoa, Solomon Islands, Tonga, Tuvalu, and Vanuatu. Leading writers from throughout this region identify contemporary educational challenges, issues, and priorities while drawing upon their own ongoing empirical research. Key themes include the impact of international trends and developments; educational reform and the quality of education; indigenous learning; inclusivity; aid and development co-operation; and the changing role and place of tertiary education. Detailed studies of specific educational systems and developments are considered in the light of broader analyses that run throughout the volume.

Politics of Preferential Development Dec 15 2021 While affirmative action has helped lessen inequality, it has not removed ethnic tension as initially envisaged. The ultimate question is whether affirmative action has led to a fairer, more just and peaceful society or whether it has simply worsened the existing situation. The book takes the view that the answer is a mixed one and reflects the complexity of the situation, rather than one which is simply positive or negative.

[Public Examinations Examined](#) Jan 04 2021 High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book ' s primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. " This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as " the diploma disease † takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog. † ? Angela W. Little, Professor Emerita, Institute of Education, University College London " This book is very well structured and written and draws on the authors ' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings. † ? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning " I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations. † ? Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

Testing and Inclusive Schooling Aug 11 2021 Testing and Inclusive Schooling provides a comparative perspective on seemingly incompatible global agendas and efforts to include all children in the general school system, thus reducing exclusion. With an examination of the international testing culture and the politics of inclusion currently permeating national school reforms, this book raises a critical and constructive discussion of these movements, which appear to support one another, yet simultaneously offer profound contradictions. With contributions from around the world, the book analyses the dilemma arising between reforms that urge schools to move towards a constantly higher academic level, and those who practice a politics of inclusion leading to a greater degree of student diversity. The book considers the types of problems that arise when reforms implemented at the international level are transformed into policies and practices, firmly placing global educational efforts into perspective by highlighting a range of different cases at both national and local levels. Testing and Inclusive Schooling

sheds light on new possibilities for educational improvements in global and local contexts and is essential reading for academics, researchers and postgraduate students interested in international and comparative education, assessment technologies and practices, inclusion, educational psychology and educational policy.

Marine Conservation in Fiji May 28 2020 In 2015 and 2016, the author participated in a community-based marine conservation project in Fiji sponsored by Global Vision International (GVI). He collected initial monitoring data on marine ecosystem species around the island of Caqalai. This data was used to assess existing conditions of the ecosystem and to help create conservation policies and educational strategies for the islanders of Caqalai. In addition, he spent a significant amount of time working with an organization on the island of Viti Levu that specializes in shark conservation. This book consists of three sections: (1) research methods for observing marine species, (2) marine species of Fiji, and (3) community-based marine conservation strategies. Each section includes a review of the literature on the subject and a summary of his experiences while in Fiji. The information presented includes explanations as to why each animal, from the smallest coral polyp to the largest bull shark, play an important role in maintaining the ecological balance of reef ecosystem. This book is intended to be used as a field guide for those interested in marine conservation in the South Pacific.

[International Perspectives on Workforce Education and Development](#) Nov 21 2019 Development of this text has been based on the notion that workforce education and development (WFED) systems—such as, secondary and postsecondary vocational and technical education (VTE), career education and guidance, human resource and organizational development (HROD), and adult training and retraining including literacy programs—have essential roles to play in supporting both individual and national efforts to successfully participate in and reap the benefits offered by globalization. While this assumption has intuitive appeal, not everyone believes that vocational preparation programs result in positive outcomes. Psacharopoulos (1997), an outspoken international critic of vocational education and training, argues that WFED programs often have a low rate of return on a country's investment when compared to that of the general academic curriculum. He contends that WFED initiatives often fail because too much emphasis is placed on these efforts to address myriad complex issues, and that decision makers do not utilize the available evidence about VTE to make prudent, informed choices. Instead, major players in the global economy like the World Bank tout basic academic education as an essential priority for developing countries wanting to enter into global markets and exchange.

Youth in Fiji and Solomon Islands Oct 01 2020 Fiji, Solomon Islands and the wider Pacific region are experiencing a 'youth bulge'. As such, the livelihoods pathways of youth in these countries will be a key determinant of their social, political and economic futures. This book looks at the cultural expectations of Fijian and Solomon Islander youth, as well as the socio-political positioning of youth activists. It investigates how formal and informal structures – such as education, employment and civil society – affect the ability of youth to achieve their potential and actively engage in their societies. Through this investigation, a recurrent theme develops of the structural minimisation of youth in these countries: they are 'to be seen but not heard'. But Pacific youth are more than citizens in waiting; they are already important members of their communities, with varying degrees of engagement in critical civil society. More than simply leaders of tomorrow, they are partners for today. Youth in Fiji and Solomon Islands documents and details some of the ways that young people in Fiji and Solomon Islands are forging their way as leaders not just of youth, but of their communities. Whilst the majority of youth are engaging in society in acceptable, social ascribed ways, and the majority of adults resist youth participation as a technique to maintain the social status quo, a small but influential cohort of both youth and adults are creating spaces for today's young people to help to shape the developmental futures of the Great Ocean States of the Pacific.

This set will be of particular interest to students and practitioners of education, politics and sociology.

The Eastern Caribbean Economic and Currency Union Apr 26 2020 The Eastern Caribbean Economic and Currency Union (OECS/ECCU) is one of four currency unions in the world. As in other parts of the world in the aftermath of the global economic and financial crisis, the region is at a crossroads, facing the major challenges of creating jobs, making growth more inclusive, reforming the banking system, and managing volatility, while grappling with high public debt and persistent low economic growth. Policymakers have the critical task of implementing strong reforms to strengthen the monetary union while also laying the foundation for accelerating growth. This Handbook provides a comprehensive analysis of the key issues in the OECS/ECCU, including its organizational and economic and financial sector linkages, and provides policy recommendations to foster economic growth.
