how do i interpret the aic r bloggers Jun 22 2022 web it s just a normal  
distribution to do this think about how you would calculate the probability  
of multiple independent events say the chance i ride my bike to work on any  
given day is 3 5 and the chance it rains is 161 365 like vancouver then the  
chance i will ride in the rain 1 is 3 5 161 365 about 1 4 so i best wear a  
coat if riding in vancouver

grouping data in r tidyverse approach r bloggers Jul 31 2020 web oct 23  
2021 grouped data mean and standard deviation calculator grouping data in r  
the group by method in tidyverse can be used to accomplish this when working  
with categorical variables you may use the group by method to divide the  
data into subgroups based on the variable s distinct categories
