[Language Disorders in Bilingual Children and Adults, Third Edition](#) Aug 08 2020 [Language Disorders in Bilingual Children and Adults, Third Edition](#), provides speech-language pathologists, advanced students in communication disorders programs, and clinical language researchers with information needed to formulate and respond to questions related to effective service delivery to bilingual children and adults with suspected or confirmed language disorders. The bilinguals of interest represent varying levels of first and second language proficiency across the lifespan. That is, bilingualism is not determined here by proficiency in each language, but rather by the individual's experience or need for two languages. In separate chapters, the book synthesizes the literature on bilingual children and adults with typical and atypical language skills. These chapters give the reader a deep understanding of the multiple factors that affect language development and disorders in those who rely on two languages for meaningful interactions. Chapters on assessment and intervention issues and methods are then presented for each population. For children, the text focuses on developmental language disorder but also discusses secondary language disorders (such as autism spectrum disorder) in bilingual populations. For adults, the focus is on aphasia, with additional discussion of dementia, traumatic brain injury, and right hemisphere disorder. Although child and adult, typical and atypical populations are presented separately, all are considered within a unifying Dynamic Interactive Processing perspective and within a new Means-Opportunities-Motives framework for understanding language disorders in bilinguals. This broad theoretical framework emphasizes interactions between social, cognitive, and communicative systems to form the basis for very practical implications related to assessment and intervention. This third edition has been completely updated to reflect the current research on bilingual populations and the best practices for working with them. Studies at the intersection of bilingualism and language disorders have expanded to include additional disorders and new language combinations. The authors synthesize the current literature and translate it for clinical use. New to the Third Edition • Coauthors Kerry Danahy Ebert, PhD, CCC-SLP and Giang Thuy Pham, PhD, CCC-SLP • Updated literature review and references to reflect new research on bilingualism, cultural competence, cognitive advantages and clinical practice with linguistically diverse populations • Case studies on assessment with bilingual children and adults • Additional tables and figures summarizing key information • Available evidence on additional child and adult language disorders in bilinguals • Updated extension activities and resource supplement

[Third Language Acquisition and Linguistic Transfer](#) Jun 29 2022 Provides a comprehensive overview of third language acquisition (additive multilingualism) in adulthood, an increasingly important subfield of language acquisition.

[Third language acquisition](#) Jun 05 2020 This book deals with the phenomenon of third language (L3) acquisition. As a research field, L3 acquisition is established as a branch of multilingualism that is concerned with how multilinguals learn additional languages and the role that their multilingual background plays in the process of language learning. The volume points out some current directions in this particular research area with a number of studies that reveal the complexity of multilingual language learning and its typical variation and dynamics. The eight studies gathered in the book represent a wide range of theoretical positions and offer empirical evidence from learners belonging to different age groups, and with varying levels of proficiency in the target language, as well as in other non-native languages belonging to the learner's repertoire. Diverse linguistic phenomena and language combinations are viewed from a perspective where all previously acquired languages have a potential role to play in the process of learning a new language. In the six empirical studies, contexts of language learning in school or at university level constitute the main outlet for data collection. These studies involve several language backgrounds and language combinations and focus on various linguistic features. The specific target languages in the empirical studies are English, French and Italian. The volume also includes two theoretical chapters. The first one conceptualizes and describes the different types of multilingual language learning investigated in the volume: i) third or additional language learning by learners who are bilinguals from an early age, and ii) third or additional language learning by people who have previous experience of one or more non-native languages learned after the critical period. In particular, issues related to the roles played by age and proficiency in multilingual acquisition are discussed. The other theoretical chapter conceptualizes the grammatical category of aspect, reviewing previous studies on second and third language acquisition of aspect. Different models for L3 learning and their relevance and implications for representations of aspect and for potential differences in the processing of second and third language acquisition are also examined in this chapter. As a whole, the book presents current research into third or additional language learning by young learners or adults, considering some of the most important factors for the complex process of multilingual language learning: the age of onset of the additional language and that of previously acquired languages, social and affective factors, instruction, language proficiency and literacy, the typology of the background languages and the role they play in shaping syntax, lexicon, and other components of a L3. The idea for this book emanates from the symposium Multilingualism, language proficiency and age, organized by Camilla Bardel and Laura Sánchez at Stockholm University, Department of Language Education, in December 2016.

[Linguistic Awareness in Multilinguals](#) Mar 15 2021 This book discusses cognitive and psycholinguistic aspects of third language acquisition and trilingualism, and explores the key role of linguistic awareness in multilingual proficiency and language learning. In view of the widespread acquisition of English by those who are already bilingual or are also acquiring a regional lingua franca this study will contribute to the current discussion of multilingualism with English in Europe and beyond, as well as the understanding of multilingual speech processing. The author supports a dynamic view of multilingualism by stressing the cognitive advantages that the contact with more languages can offer and uses this approach as the basis for future language teaching and learning. Chapters cover topics such as performing in a third language, metalinguistic awareness in multilinguals and in multilingual education, and English as a third language in Europe.

[Third Language Learners](#) Apr 15 2021 The book aims to provide a bridge between two applied linguistics subfields, namely those of interlanguage pragmatics and third language acquisition. It examines the production and identification of request acts formulas on the part of bilingual learners of English in the Valencian Community (Spain). Previous to the empirical study itself, we present an overview of the theoretical background and the sociolinguistic context where the experiment was conducted.

[English in Europe](#) Apr 27 2022 This book emerges as a response to the increasing use of English as a lingua franca in the multilingual European context. It provides an up-to-date overview of the sociolinguistic, psycholinguistic and educational aspects of research on third language acquisition by focusing on English as a third language.

[Third Language Acquisition and Universal Grammar](#) Feb 11 2021 This volume presents studies which approach the relatively new field of third language (L3) acquisition from the generative linguistic perspective. It aims to bring together researchers who are interested in L3 acquisition and who are at the same time working within the generative framework i.e. Chomsky's Universal Grammar (UG) approach to language acquisition. A total of nine contributions are included, reporting research on L3 involving different combinations of

source/target languages and investigating various UG-related properties.

Techniques and Principles in Language Teaching 3rd edition - Oxford Handbooks for Language Teachers Apr 03 2020 Techniques and Principles in Language Teaching has influenced the way thousands of teachers have taught English. This classic guide to developing the way you teach has been an essential resource to new and experienced teachers worldwide, and is now in its third edition. Each chapter focuses on a different teaching approach, describing it being used in the classroom, analyzing what happened, and helping you think how you could apply it to your own teaching. New features of the third edition include: a new discussion on the political dimensions of language teaching, a new digital technology chapter, and extended coverage of content-based and task-based approaches. On this site you will find additional resources, including author videos in which Diane Larsen-Freeman and Marti Anderson talk about the background to the book and new innovations in language teaching which are discussed in the third edition.

Just Words Aug 27 2019 Is it "just words" when a lawyer cross-examines a rape victim in the hopes of getting her to admit an interest in her attacker? Is it "just words" when the Supreme Court hands down a decision or when business people draw up a contract? In tackling the question of how an abstract entity exerts concrete power, Just Words focuses on what has become the central issue in law and language research: what language reveals about the nature of legal power. John M. Conley, William M. O'Barr, and Robin Conley Riner show how the microdynamics of the legal process and the largest questions of justice can be fruitfully explored through the field of linguistics. Each chapter covers a language-based approach to a different area of the law, from the cross-examinations of victims and witnesses to the inequities of divorce mediation. Combining analysis of common legal events with a broad range of scholarship on language and law, Just Words seeks the reality of power in the everyday practice and application of the law. As the only study of its type, the book is the definitive treatment of the topic and will be welcomed by students and specialists alike. This third edition brings this essential text up to date with new chapters on nonverbal, or "multimodal," communication in legal settings and law, language, and race.

How Babies Talk Sep 08 2020 In their first three years of life, babies face the most complex learning endeavor they will ever undertake as human beings: They learn to talk. Now, as researchers make new forays into the mystery of the development of the human brain, Golinkoff and Hirsh-Pasek, both developmental psychologists and language experts, offer parents a powerfully insightful guidebook to how infants—even while in the womb—begin to learn language. Along the way, the authors provide parents with the latest scientific findings, developmental milestones, and important advice on how to create the most effective learning environments for their children. This book takes readers on a fascinating, vitally important exploration of the dance between nature and nurture, and explains how parents can help their children learn more successfully.

The Cambridge Handbook of Second Language Acquisition Jul 27 2019 What is language and how can we investigate its acquisition by children or adults? What perspectives exist from which to view acquisition? What internal constraints and external factors shape acquisition? What are the properties of interlanguage systems? This comprehensive 31-chapter handbook is an authoritative survey of second language acquisition (SLA). Its multi-perspective synopsis on recent developments in SLA research provides significant contributions by established experts and widely recognized younger talent. It covers cutting edge and emerging areas of enquiry not treated elsewhere in a single handbook, including third language acquisition, electronic communication, incomplete first language acquisition, alphabetic literacy and SLA, affect and the brain, discourse and identity. Written to be accessible to newcomers as well as experienced scholars of SLA, the Handbook is organised into six thematic sections, each with an editor-written introduction.

Language of the Third Reich Mar 27 2022 Victor Klemperer was Professor of French Literature at Dresden University. As a Jew, he was removed from his post in 1935, only surviving thanks to his marriage to an Aryan. Presenting a study of language and its engagement with history, this book draws from Klemperer's conviction that the language of the Third Reich helped to create its culture.

Language in Louisiana Jun 25 2019 Contributions by Lisa Abney, Patricia Anderson, Albert Camp, Katie Carmichael, Christina Schoux Casey, Nathalie Dajko, Jeffery U. Darenbourg, Dorian Dorado, Connie Eble, Daniel W. Hieber, David Kaufman, Geoffrey Kimball, Thomas A. Klingler, Bertney Langley, Linda Langley, Shane Lief, Tamara Lindner, Judith M. Maxwell, Rafael Orozco, Allison Truitt, Shana Walton, and Robin White Louisiana is often presented as a bastion of French culture and language in an otherwise English environment. The continued presence of French in south Louisiana and the struggle against the language's demise have given the state an aura of exoticism and at the same time have strained serious focus on that language. Historically, however, the state has always boasted a multicultural, polyglot population. From the scores of indigenous languages used at the time of European contact to the importation of African and European languages during the colonial period to the modern invasion of English and the arrival of new immigrant populations, Louisiana has had and continues to enjoy a rich linguistic palate. Language in Louisiana: Community and Culture brings together for the first time work by scholars and community activists, all experts on the cutting edge of research. In sixteen chapters, the authors present the state of languages and of linguistic research on topics such as indigenous language documentation and revival; variation in, attitudes toward, and educational opportunities in Louisiana's French varieties; current research on rural and urban dialects of English, both in south Louisiana and in the long-neglected northern parishes; and the struggles more recent immigrants face to use their heritage languages and deal with language-based regulations in public venues. This volume will be of value to both scholars and general readers interested in a comprehensive view of Louisiana's linguistic landscape.

Multilingualism and third language acquisition May 29 2022 The purpose of this book is to present recent studies in the field of multilingualism and L3, bringing together contributions from an international group of specialists from Austria, Canada, Germany, Portugal, Spain, Switzerland, Turkey, and United States. The main focuses of the articles are three: language acquisition, language learning and teaching. A collection of theoretical and empirical articles from scholars of multilingualism and language acquisition makes the book a significant

resource as the papers present a wide perspective from main theories to current issues, reflecting new trends in the field. The authors focus on the heterogeneity and complexity that characterize third language acquisition, multilingual learning and teaching. As the issues addressed in this book intersect, it represents an asset and therefore the texts will be of great relevance for the scientific community. Part I presents different topics of L3 acquisition, such as syntax, phonology, working memory and selective attention, and lexicon. Part II comprises texts that show how the research on language acquisition informs pedagogical issues. For instance, the role of the knowledge of previous languages in the teaching of L3, the attitudes of multilingual teachers to plurilingual approaches, and the benefits of crosslinguistic pedagogy versus classroom monolingual bias. In sequence, Part III consists of texts on individual learning strategies, such as motivation and attitudes, crosslinguistic awareness, and students' perceptions about teachers' "plurilingual nonnativism". All these chapters include several different languages in contact in an acquisition/learning context: Basque, English, French, German, Italian, Latin, Portuguese, Russian, Spanish, and Turkish.

Cross-linguistic Influence in Third Language Acquisition Dec 24 2021 Third language acquisition is a common phenomenon, which presents some specific characteristics as compared to second language acquisition. This volume adopts a psycholinguistic approach in the study of cross-linguistic influence in third language acquisition and focuses on the role of previously acquired languages and the conditions that determine their influence.

Multilingual Lexical Recognition in the Mental Lexicon of Third Language Users Jan 01 2020 The monograph constitutes an attempt to demonstrate that trilinguals should be considered as learners and speakers in their own right as opposed to L2 learners with a view to enumerating consequences this would bring to third or additional language teaching. Its theoretical part offers an insight into the structure of the multilingual mental lexicon which is a product of the interplay of a whole array of cross-linguistic factors in the minds of multilingual speakers. The empirical part reports the findings of an empirical study which aimed to investigate connections which are formed between multiple languages in a multilingual mind. All the aspects, analyzed in the experiments are part of a broader question of how multilinguals make their lexical decisions and, more specifically, how they recognize words from different languages. The book closes with the discussion of the role of the obtained results for multilingual didactics as well as some possible areas for future research.
