Complex Litigation Sep 01 2022 This unique coursebook has a
number of distinguishing features. First, unlike traditional
casebooks with their primary focus on case materials, the text
presents a limited number of leading cases, coupled with
extensive textual and note material reviewing existing doctrine
and exploring unanswered legal and policy issues. Second, the
text is current on cutting-edge issues while still paying attention
to the fundamentals. Third, the text is both compact and
comprehensive. This text aims to be state-of-the-art in the field of
complex litigation and is designed for use in ether two- or three-
unit courses. In addition to structural issues, such as Internet
jurisdiction, the use of "minimal diversity" as a basis for federal
jurisdiction, and mechanisms for the coordination of overlapping
federal and state litigation, the text contains in-depth discussion
of: The most recent developments in class action practice under
Federal Rule 23; appointment and compensation of lead and class
counsel; operation of the multidistrict statute; choice of law
issues in multijurisdictional cases; and preclusion issues raised by
complex cases, including limits on the use of non-party preclusion
under the Supreme Court's decision in Taylor v. Sturgell. The text
also examines core aspects of the complex litigation process
itself, including judicial management of the pre-trial process, the
conduct and control of discovery with a focus on the burgeoning
field of electronic discovery including metadata, and mechanisms
